## **Conflict Minerals Policy**

ViTrox is committed to conducting its business activities in a socially responsible and ethical manner. As part of this commitment, ViTrox recognises the importance of addressing the issue of conflict minerals including 3TG (tantalum, tin, tungsten, and gold) sourced from Democratic Republic of Congo (DRC) that have the potential to lead to human rights violation. ViTrox is dedicated to ensuring that its supply chain does not contribute to these negative impacts.

### **We implement our responsibility through the following actions:**

1. ViTrox is dedicated to ethical sourcing, following all laws on conflict minerals and conducting due diligence.
2. ViTrox expects suppliers to comply with our policy and provide accurate information of mineral origin.
3. ViTrox requires suppliers to have a written policy and procedure in place to avoid knowingly acquiring conflict minerals or unsustainable mined minerals produced at high environmental and social costs. (Sourced from SCOC section 5.12)
4. ViTrox assists supply chain partners in policy adherence and works cooperatively with them in implementing the policy.
5. ViTrox is committed to ethical sourcing, responsible business practices, and promoting peace and stability in conflict-affected regions.
6. ViTrox may reconsider its willingness to partner with suppliers who fail to comply with this Policy.
