A12 Significant related party transactions

There were no significant related party transactions during the current quarter under review.

A13 Financial instruments**i) Derivatives**

As at 30 September 2019, the Group's outstanding derivatives are as follows:-

	RM'000
Forward exchange contracts - at fair value	
- Current liabilities	<u>422</u>

Derivatives consist of forward exchange contracts which are used to hedge the exposure to currency risk. The Group does not apply hedge accounting. As at 30 September 2019, the Group had contracts with financial institutions due within 1 year to buy RM38,279,000 and USD9,228,000 at contractual forward rates.

The fair values of forward exchange contracts were quoted by the financial institutions, which normally measured the fair values using present value technique by discounting the differences between contractual forward prices and observable current market forward prices using risk-free interest rate (i.e. Level 2).

ii) Gains/(Losses) arising from fair value changes of financial liabilities

There were no gains/(losses) arising from fair value changes of financial liabilities for the current quarter and period ended 30 September 2019.

iii) Fair value

The Group uses valuation techniques that are appropriate in the circumstances and for which sufficient data are available to measure fair value, maximising the use of relevant observable inputs and minimising the use of unobservable inputs.

The inputs to valuation techniques used to measure fair value are categorised into the following levels of fair value hierarchy:-

- (i) Level 1 - quoted prices (unadjusted) in active markets for identical assets or liabilities that the entity can access at the measurement date.
- (ii) Level 2 - inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly or indirectly.
- (iii) Level 3 - unobservable inputs for the asset or liability.

As at end of the current quarter under review, the carrying amounts of receivables, cash and cash equivalents and payables which are short-term in nature or repayable on demand are reasonable approximations of fair values.

The fair value of long term loans are measured using present value technique by discounting the expected future cash flows using observable current market interest rates for similar liabilities (i.e. Level 2). The fair values measured are considered to be reasonably close to the carrying amount reported as the observable current market interest rates also approximate to the effective interest rates of term loans.

The fair value of forward exchange contracts were quoted by the financial institutions, which normally measured the fair values using present value technique by discounting the differences between contractual forward prices and observable current market forward prices using risk-free interest rate (i.e. Level 2).

There were no transfers between levels of fair value hierarchy during the current quarter under review.

Revenue	66,509	101,770	(35,261)	-34.65%

Profit attributable to owners of the Company	<u>13,856</u>	<u>28,021</u>	<u>(14,165)</u>	<u>-50.55%</u>

The Group achieved revenue of RM66.51 million for the quarter under review against RM101.77 million in the corresponding quarter of preceding year, representing a decrease of 35%. The decrease in revenue was mainly because of decline in customer demand by 39% and 24% from Automated Board Inspection (ABI) and Machine Vision System (MVS) respectively.

The Group achieved a profit before tax of RM14.30 million against profit before tax of RM30.02 million in the corresponding quarter of preceding year, representing a decrease of 52%. Lower profit before tax was because of decline in sales volume coupled with product mix apart from continuous investment in R&D activities. Accordingly, the Group's profit after tax is at RM13.86 million against profit after tax of RM28.02 million in the corresponding preceding quarter.

	CUMULATIVE QUARTER

The Group recorded revenue of RM244.50 million in the period ended 30 September 2019, a decrease of 14% as compared to the preceding period ended 30 September 2018. The decrease was mainly due to decline in customer order for MVS.

The profit before tax was declined by RM17.56 million as compared with preceding year corresponding period. The decrease was mainly due to softer revenue in the current period.

The effective tax rate of the Group for the current financial period is lower than the statutory tax rate of 24%. This was mainly due to tax incentive enjoyed by its wholly-owned subsidiary, ViTrox Technologies Sdn. Bhd. ("VTSB") and ViE Technologies Sdn. Bhd. ("ViE").

VTSB has been granted pioneer status by MITI for a period of 5 years to undertake activities relating to development and production of embedded intelligent robotic inspection system and machine with M2M connectivity and predictive analytic capability for semiconductor and electronics industries. The incentive commenced from 17 June 2015 to 16 June 2020 (extendable for further 5 years). With effective from 17 August 2018 until 16 June 2020 (extendable for further 5 years), the pioneer activities have been extended to its related modules. The current provision of income tax is in respect of certain non-business income and non-tax exempted income generated from non-pioneer products and services.
