

ViTrox Held a Successful UGM for ViTrox Users in Brazil

PENANG MALAYSIA – August 2015 – ViTrox Technologies, a solutions provider of innovative, advanced and cost-effective automated vision inspection systems and equipment for the semiconductor and electronics packaging industries, successfully launched another User Group Meeting (UGM) in Brazil with the collaboration of its Strategic Channel Partner, Automatic Test Experts (ATESS). The event attracted about 20 participants from eight companies, including MagnetiMarelli, Flextronics, Flextronics Jaguarina, Fit Instituto de Tecnologica, Continental, Jabil, HP and Kostal.

The main objective of this event was to share the latest features of ViTrox's Advanced X-ray inspection (AXI) and Advanced Optical Inspection (AOI). ViTrox's speakers of the day – Seow Zi Yang and Tina Khor Bee Kim – presented the capabilities and new features for AXI and AOI. Users were able to learn first-hand about the new features of ViTrox AOI and AXI products.

Overall, the event was a success and ViTrox received numerous positive reviews from the attendees. One of the participants, Alvaro Schiavolin Jr, Automation Engineer from Fit Instituto de Tecnologica, claimed that, "The sharing session is inspiring, especially the ability to inspect using the camera and shadow free method".

Carlos Eduardo, Technical Specialist from Flextronics, commented, "This event is great. Please continue with the same quality in the next event. Congratulations for the event."

At the end of session, there was an interactive session and Question & Answer session. Participants were able to share their experiences and problems encountered when using ViTrox's product. They were able to get immediate solutions or suggestions from the ViTrox sales team and ATESS experts during the interactive session. Additionally, ViTrox held a drawing for participants who attended this event.
