

## ViTrox to Participate in SMTAI Virtual Expo

PENANG, MALAYSIA — ViTrox Technologies, an innovative, advanced and cost-effective automated 3D Machine Vision inspection solution provider for the semiconductor and electronics packaging industries, announces its participation at the SMTA International 2020 virtual exposition during September 28 - October 23, 2020.

This is the first online virtual trade show that ViTrox will be participating during the New Normal. This time, ViTrox is showcasing the latest full range of Automated Board Inspection (ABI) solutions. Through this online virtual trade show, participants will have the opportunity to explore the trade show floor virtually, download product information, watch ViTrox product videos, and communicate with ViTrox experts via live chat and 1:1 video chat. Please note that the live chat with ViTrox experts will only be available on the first three days of the virtual trade show from September 28 - 30, 2020. Quickly reserve your calendar and don't miss out this golden opportunity!

Through this event, participants can learn about the full range of ViTrox Machine Vision solutions and its Industry 4.0 Smart Solution V-ONE. The full range of ViTrox Machine Vision solutions includes Advanced 3D X-Ray Inspection (AXI) solution, Advanced 3D Optical Inspection (AOI) solution, Advanced 3D Solder Paste Inspection System (API) solution, Conformal Coating Inspection, and V-ONE. ViTrox Vision solutions enable the transformation into smart SMT factory while maximizing the production performance to achieve high accuracy, fast and high-quality inspection results with cost-effective machine vision solutions. Through this event, participants will have the opportunity to learn the benefits of ViTrox Inspection solutions and how ViTrox can assist them to enhance their SMT production efficiency during this new normal with the insightful information about the solutions.

Furthermore, the Industry 4.0 Smart Solution V-ONE is featured with built-in machine learning tools which enable users to utilize the system easily. V-ONE also caters to provide informative analytics for users on a real-time basis with many innovative features such as data analysis, status monitoring, alert plan feature, ticketing for maintenance purpose and a fully configurable dashboard. Overall, V-ONE focuses its theme in CONNECT, VISUALIZE and PROACT to cater the manufacturing needs and assist users to embark on the journey towards digital twin in manufacturing with these three themes.

Join ViTrox at SMTA International from September 28 - October 23, 2020. Register with SMTA International with this link - <https://smta.org/mpage/smtai-reg> and visit ViTrox's virtual booth during the event! You are encouraged to register as soon as possible as ViTrox experts will be live during September 28 - 30, 2020. You may visit ViTrox corporate website via [www.vitrox.com](http://www.vitrox.com) for more information about ViTrox's products and services and connect with our sales experts.
